

Larimer County Enterprise GIS

Enterprise GIS is a service comprised of dedicated IT GIS professional staff, hardware, software, data, processes and deliverables that aims to provide geospatial data, information and solutions to Larimer County staff and the general public on behalf of Larimer County. Enterprise GIS also provides day to day support for GIS solutions, service initiatives, and consulting support services to internal departments up to and including project level support, design/build and implementation.

Geographic Information System – GIS

- ▶ **Geographic** - Relating to places, spaces, areas on Planet Earth
- ▶ **Information** - A meaningful, valued arrangement of data
- ▶ **System** - A Set of interconnected parts forming a unified whole
- ▶ People - Users, Trained professionals, stake holders, etc...
- ▶ Hardware (Infrastructure) - computers, devices, printers, network
- ▶ Software - Databases, spreadsheets, GIS applications, web technology, etc...
- ▶ Questions to be answered, problems to be solved, What-if scenarios to be analyzed
- ▶ A GIS is a purposefully created and maintained system of people, infrastructure and software which strives to model and gain insight from things and relationships of things located on Planet Earth.
