The Larimer County Weed District was established in 1967 to assist citizens with the management of Canada thistle, leafy spurge and other invasive plants.

In 1985, a mill levy was established to fund the Weed District. Today, the levy is 0.143 mills on the assessed value of private land.

The Weed District contains the eastern, more populated areas of Larimer County.

Today, the Larimer County Weed District provides vital services for landowners to address noxious weed concerns:

- Site visits
- Cost-share program
- Herbicide sales
- Presentations
- Printed materials
